

# How should we define education ?

- Holistic

( connect the dots b/w disciplines )

- Highlights innovative approaches

( Far less focus on credentials & licensure )

- Teaches one 'how to think'

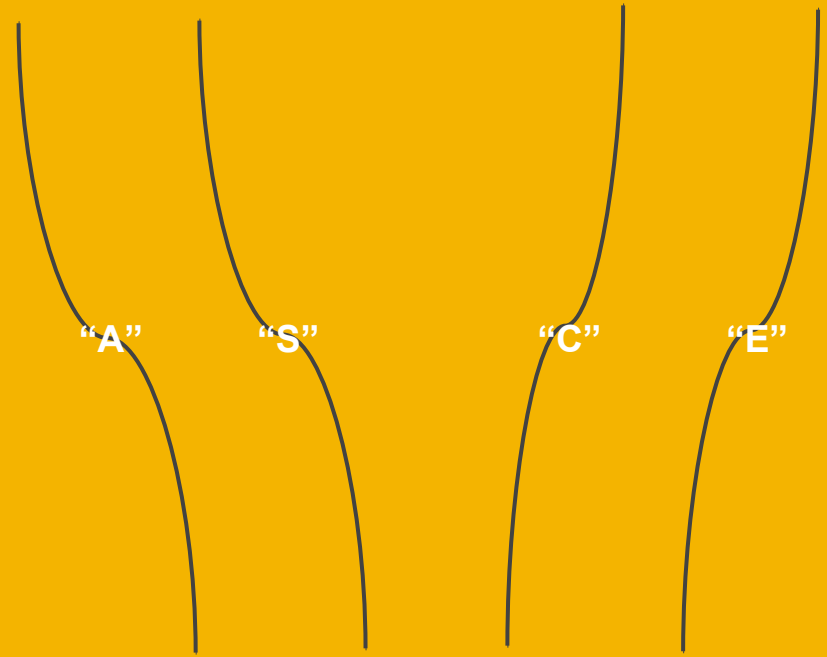

( critically, creatively, & with passion to learn + grow. )

- How to make a difference > how to live to work

( careerist v. creator/builder )

- Virtues + principle centered, & with a focus on lifelong learning
